Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 195, Nos. 1 & 2, May 1999

R.J.C. Levine, J.B. Caulfield, P. Norton, P.D. Chantler, M.R. Deziel, H.S. Slayter and S.S. Margossian: Myofibrillar protein structure and assembly during idiopathic dilated cardiomyopathy 1–10

A. Shamim, T. Pelzer, C. Grohé and L. Neyses: Induction of Egr-1 mRNA and protein by endothelin 1, angiotensin II and norepinephrine in neonatal cardiac myocytes 11–17

C. Wang, W.-J. Young and C. Chang: Androgen effects on the solubility and conformational change of the androgen receptor in baculovirus expression system 19–23

R.K. Srivastava, A.R. Srivastava, P. Seth, S. Agrawal and Y.S. Cho-Chung: Growth arrest and induction of apoptosis in breast cancer cells by antisense depletion of protein kinase A-RIα subunit: p53-independent mechanism of action 25–36

U. Küchenmeister, G. Kuhn, J. Wegner, G. Nürnberg and K. Ender: Post mortem changes in Ca^{2+} transporting proteins of sarcoplasmic reticulum in dependence on malignant hyperthermia status in pigs 37–46

L. Giunchi, G. Nocentini, S. Ronchetti, A. Bartoli, C. Riccardi and G. Migliorati: TCRκ, a new splicing of the murine TCRζ gene locus, is modulated by glucocorticoid treatment 47–53

A.A. Pantazaki, C.G. Anagnostopoulos, E.E. Lioliou and D.A. Kyriakidis: Characterization of ornithine decarboxylase and regulation by its antizyme in *Thermus thermophilus* 55–64

M. Mehta and M. Chowdhury: A mannose-binding glycoprotein found in the 4 day *post coital* rat uterus is involved in pregnancy 65–75

G.R. Lee, S.N. Kim, K. Noguchi, S.D. Park, S.H. Hong and Y.S. Cho-Chung: $Ala^{99}ser$ mutation in RI_{α} Regulatory Subunit of protein kinase A causes reduced kinase activation by cAMP and arrest of hormone-dependent breast cancer cell growth 77–86

T. Baba and M. Yamaguchi: Stimulatory effect of regucalcin on proteolytic activity in rat renal cortex cytosol: Involvement of thiol proteases 87–92

J. Fukuzawa, T. Haneda and K. Kikuchi: Arginine vasopressin increases the rate of protein synthesis in isolated perfused adult rat heart via the V_1 receptor 93–98

F. Boudreau, S. Zannoni, N. Pelletier, T. Bardati, S.-J. Yu and C. Asselin: Negative regulation of glucocorticoid-dependent induction of c-*fos* by *ras* in intestinal epithelial cells 99–111

D.R. Finder and C.D. Hardin: Transport and metabolism of exogenous fumarate and 3-phosphoglycerate in vascular smooth muscle 113–121

R.C. Kukreja, Y.-Z. Qian, S. Okubo and E.E. Flaherty: Role of protein kinase C and 72 kDa heat shock protein in ischemic tolerance following heat stress in the rat heart 123–131

C.E. Torres-Mendoza, A. Albert and M.J. de la Cruz Arriaga: Molecular study of the rat liver NADH: Cytochrome *c* oxidoreductase complex during development and ageing 133–142

K. Narasimhamurthy and P.L. Raina: Long term feeding effects of heated and fried oils on lipids and lipoproteins in rats 143–153

J.P. Infante and V.A. Huszagh: Mechanisms of resistance to pathogenesis in muscular dystrophies 155–167

T.J. Jacks, A.J. De Lucca and N.M. Morris: Effects of chloroperoxidase and hydrogen peroxide on the viabilities of *Aspergillus flavus* conidiospores 169–172

K.J. Cowan and K.B. Storey: Reversible phosphorylation control of skeletal muscle pyruvate kinase and phosphofructokinase during estivation in the spadefoot toad, *Scaphiopus couchii* 173–181

Y. Xu, R.L. Hopfner, J.R. McNeill and V. Gopalakrishnan: Vasopressin accelerates protein synthesis in neonatal rat cardiomyocytes 183–190

L. Schild, R. Matthias, A. Stanarius, G. Wolf, W. Augustin and W. Halangk: Induction of permeability transition in pancreatic mitochondria by cerulein in rats 191–197

V. Stepanova, S. Mukhina, E. Köhler, T.J. Resink, P. Erne and V.A. Tkachuk: Urokinase plasminogen activator induces human smooth muscle cell migration and proliferation via distinct receptor-dependent and proteolysis-dependent mechanisms 199–206

T.R.L. Fernandes, F. Suzuki-Kemmelmeier, E.L. Ishii-Iwamoto, J. Constantin and A. Bracht: Regional heterogeneities in the production of uric acid from adenosine in the bivascularly perfused rat liver 207–217

T. Putilina, P. Wong and S. Gentleman: The DHHC domain: A new highly conserved cysteine-rich motif 219–226

H. Barata, C.M. Cardoso, H. Wolosker and L. de Meis: Modulation of the low affinity Ca^{2+}-binding sites of skeletal muscle and blood platelets Ca^{2+}-ATPase by nordihydroguaiaretic acid 227–233

S.A. Longhi, M.E. Miranda, M.G. Gobet and L.A. Retegui: A monoclonal antibody recognizing an epitope shared by receptors for growth hormone, prolactin, interleukin 2 and interleukin 6 235–243

J.M. Crisman, P.J. Elder, N.M. Wilkie and P.E. Kolattukudy: Identification of amino acids involved in the binding of hMIP-1α to CC-CKR1, a MIP-1α receptor found on neutrophils 245–256

A. Takeda, A. Sakata and N. Takeda: Detection of hepatitis C virus RNA in the hearts of patients with hepatogenic cardiomyopathy 257–261
